AOBAKWE ROBYN P KENOSI

Junior Software Developer

Portfolio: ARPK
github.com/pelonomiken
linkedin.com/in/arpk18

A results-oriented developer with practical experience in building solutions through participation in hackathons, industry projects, and professional internships. Since July 2024, I have been engaged in delivering impactful software solutions, effectively integrating strong technical skills with a problem-solving approach. I possess a keen passion for innovation, an ability to adapt under pressure, and a commitment to continuous learning within fast-paced environments.

EDUCATION

Bachelor of Science in Computer Systems Engineering, *University Of Sunderland* — 2023 — 2024
Diploma in Computer Systems Engineering, *Botswana Accountancy College* — 2020 — 2023

TECHNICAL EXPERIENCE

Software Developer Intern (Industrial Attachment) , Spectrum Analytics — Jan 2023 — Jun 2023
Full-Stack Developer — *Gaborone*

- Developed API-driven features with FastAPI, enhancing backend functionality with input validators and security measures.
- Built a user registration interface using Django and containerized services via Docker for cross-platform cloud deployment.
- Designed a MongoDB database with custom classifiers to optimize data management and deployment

Content Creation and Design

- Planned content schedules in Miro to streamline social media engagement and marketing outreach.
- Designed event info graphics and promotional posters using Figma, boosting audience awareness and participation.

Graduate Junior Software Developer, Techno Fairy — Jul 2024 — **Present**
Junior Software Developer — *Gaborone*

- Collaborated with technical leads and colleagues to design, develop, and test web applications, ensuring alignment with user and business requirements.
- Led specific project components, in the development of web applications, overseeing implementation, testing, and timely delivery.
- Improved project transparency by generating progress reports, tracking enhancements, and resolving critical technical issues.
- Participated in hackathons and technical workshops, contributing innovative ideas and applying newly acquired skills to improve team projects.
- Developed and deployed a client-facing company website using WordPress,customizing themes and plugins to enhance online presence and improve client engagement.
- Contributed to the development of mobile applications using React Native, implementing UI components, navigation, and API integrations.

SKILLS

Languages	Java, Python, JavaScript, HTML, CSS
Frameworks	Next.js, Fast API, Bootstrap, React Native
CMS	WordPress
DevOps & Collaboration Tools	GitHub,Git, Postman, Docker(basic)
Design & Prototyping	Figma, Canva

CERTIFICATIONS
